

Office of Neighborhood Services

City of Richland Hills, Texas

Memorandum

To: Honorable Mayor Bill Agan and members of the Richland Hills City Council
From: Scott Mitchell, Director of Neighborhood Services
Date: February 17, 2015
Subject: Street Repair / Replacement Project

Council Action Requested:

Consider approval of Street Repair Project.

Background Information:

In the approved Fiscal Year 2014-2015 Budget, \$55,000 was included in the street department budget for selected “spot” street repairs. This is in addition to the \$133,255 that we budgeted for street reconstruction out of the Road and Street Improvement budget.

This proposed project includes the life extension of sections of six streets through the process of chip seal / slurry seal. There is a total of 23,911 square yards of pavement that we can extend the life of for an additional seven to ten years before having to replace. The cost for this part of the project is \$54,322.00 utilizing a cooperative bid process with North Richland Hills. This project is planned to begin in the spring of this year.

The funds for this project will come from the \$55,000 that was budgeted in the street department for repairs. The other funds that have been allocated by the City Council for street replacement will be brought forth for approval at a later date.

Board/Citizen Input: Infrastructure Committee Reviewed this item on Jan. 21, 2015.

Financial Impact: \$54,322
